View the DVD With Your Child and M

Children learn best through interactions with their loved ones. Share this DVD with your child and see how the baby Muppets and their caregivers connect and learn by exploring their world through movement. These shared, joyful experiences build close bonds between caregiver and child. As they explore together, through crawling, walking, dancing and wiggling, the caregivers nurture their children's self-esteem, curiosity and excitement about making new discoveries. Throughout the day, encourage your child's positive sense of self and eagerness to learn by flying like a dragonfly, taking baby steps, moving and singing to the baby beat and playing pretend during daily routines.
